

# Demo / Presentation Report

Accessibility and Performance Audit - Before vs After Evidence Package

Prepared for Demo Presentation

**Baseline URL:**

http://localhost:8000/

**Redesigned URL:**

http://localhost:8001/

**Tools:**

Lighthouse CLI, axe-core CLI

**Status:**

Documentation Updated

## Before/After Lighthouse Scores

| Category       | Before | After | Delta |
|----------------|--------|-------|-------|
| Performance    | 95     | 74    | -21   |
| Accessibility  | 91     | 95    | +4    |
| Best Practices | 89     | 96    | +7    |
| SEO            | 91     | 100   | +9    |

## Key Findings

- Accessibility, best-practices, and SEO improved in the redesigned version.
- Performance regressed due to heavier visual payload and asset-loading characteristics.
- Latest axe-core run reports 0 violations for WCAG 2A/2AA tags.

## Issues Table (Severity / Impact / Fix)

| Severity | Issue                           | Impact                                                        | Fix / Recommendation                                                 |
|----------|---------------------------------|---------------------------------------------------------------|----------------------------------------------------------------------|
| High     | Performance drop after redesign | Slower page experience and lower Lighthouse performance score | Optimize/replace heavy imagery, reduce external dependencies, retest |

| Severity | Issue                                              | Impact                                           | Fix / Recommendation                                               |
|----------|----------------------------------------------------|--------------------------------------------------|--------------------------------------------------------------------|
| Medium   | Console network warning (missing optional asset)   | QA signal noise and best-practice quality risk   | Add favicon and verify static asset references                     |
| Medium   | Ongoing accessibility risk in dynamic interactions | Potential regression during future UI iterations | Keep Lighthouse + axe + keyboard regression checks in release flow |

PASSED AUDITS (26)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

INTERNATIONALIZATION AND LOCALIZATION

**<html> element does not have a `lang` attribute**

▼

These are opportunities to improve the interpretation of your content by users in different locales.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

PASSED AUDITS (10)

Show

NOT APPLICABLE (46)

Show

Best Practices

USER EXPERIENCE

Does not have a `<meta name="viewport">` tag with `width` or `initial-scale`

No `<meta name="viewport">` tag found

▼

Document doesn't use legible font sizes

Text is illegible because there's no viewport meta tag optimized for mobile screens.

▼

GENERAL

Browser errors were logged to the console

▼

TRUST AND SAFETY

☐ Ensure CSP is effective against XSS attacks

▼

☐ Use a strong HSTS policy

▼

☐ Ensure proper origin isolation with COOP

▼

☐ Mitigate clickjacking with XFO or CSP

▼

☐ Mitigate DOM-based XSS with Trusted Types

▼

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

CONTENT BEST PRACTICES

▲ Document does not have a meta description ▼

Format your HTML in a way that enables crawlers to better understand your app's content.

ADDITIONAL ITEMS TO MANUALLY CHECK (1) Show

Run these additional validators on your site to check additional SEO best practices.

Before: Lighthouse baseline score capture

▲ 0-49    ■ 50-89    ● 90-100

## Expand view

|                            |        |
|----------------------------|--------|
| ▲ First Contentful Paint   | 3.5 s  |
| ■ Largest Contentful Paint | 3.6 s  |
| ● Total Blocking Time      | 0 ms   |
| ● Cumulative Layout Shift  | 0      |
| ▲ Speed Index              | 25.7 s |

 [View Treemap](#)

Later this year, insights will replace performance audits. [Learn more and provide feedback here.](#)

Show audits relevant to: **All** FCP LCP TBT

- Render blocking requests — Est savings of 2,340 ms
- Network dependency tree
- Use efficient cache lifetimes — Est savings of 22 KiB
- Document request latency — Est savings of 11 KiB
- Optimize DOM size
- LCP breakdown
- 3rd parties

8/10

DIAGNOSTICS

- Minify CSS — Est savings of 3 KiB
- Avoid long main-thread tasks — 4 long tasks found
